Cloud FinOps

Optimize your cloud IT spending

The rush to get business IT into the cloud over the past few years have both CIOs and CFOs rethinking their cloud spending today. Blue Mantis FinOps delivers cloud cost optimization as a turnkey service with quick time to value that IT and finance leaders will love.

Save an average 30% on cloud costs

Start with our no-cost assessment of your multi-cloud environment using our agentless monitoring tools. Based on the results of that assessment, Blue Mantis will show how our FinOps can save you an average 30% on your annual cloud costs—with no obligation to buy after the free assessment.

Visualize your cloud cost savings

Blue Mantis developed CloudLighthouse, our unique cloud-native app that provides unparalleled visibility into the costs associated with your organization's cloud environment. Our dedicated team of FinOps experts use this and other tools to develop "what if" scenarios for your spending on cloud based software, infrastructure, and services across your organization.

Our specialists in FinOps have proven track records in optimizing cloud costs for hundreds of customers. We partner with your IT and finance teams to help manage multiple cloud vendor costs so you can focus on growing your business rather than paying bills.

Save money to spark innovation

Blue Mantis FinOps supports organizations with single, multi-cloud, and hybrid cloud environments built on Amazon, Microsoft, Google, and hundreds of IaaS and SaaS providers. Our FinOps tools deploy quickly, have no impact on cloud performance, and can be securely accessed by your IT and finance teams from any web browser.

Providing significant cost savings on cloud usage

Tools

Gain deep analytics and real-time governance over your multi-cloud environment with our unique tools that provisions licenses, estimates usage, and compares cloud costs

Service

Add a new level of cloud financial expertise to your organization with our team of certified FinOps specialists who model "what if" scenarios to find new ways to save
