

Shared Responsibility Model Half-Day Workshop

Clarify Roles, Optimize Responsibility

Organizations often face confusion over their roles and responsibilities within the shared responsibility model for cloud services, leading to gaps in security and compliance. Misaligned expectations between cloud providers and internal teams can result in unprotected data, misconfigured systems, and increased risk of breaches.

This Blue Mantis workshop educates teams, assesses capabilities, and delivers actionable steps to adopt a shared responsibility model, optimizing processes, reducing risks, and ensuring operational success.

Shared Responsibility Adoption

Blue Mantis Shared Responsibility Model Adoption Half-Day Workshops equip you with the tools to align your infrastructure and operations with shared responsibility principles. The workshop combines foundational education with a comprehensive assessment of 20 key disciplines, including Asset Management and Service Level Management. You get recommendations customized for your business with actionable steps that optimizes collaboration with service providers to reduce risks and achieve long-term operational success.

Benefits

- Build a strong foundation in shared responsibility principles to align your IT operations with efficiency and collaboration goals.
- Assess capabilities across 20 key disciplines to identify your strengths and areas for improvement.
- Receive customized recommendations to optimize processes, reduce risks, and achieve long-term operational success.

Shared Responsibility Model¹
