# Hypervisor Half-Day Workshop

Streamline Hypervisor Assessment

Organizations evaluating their hypervisor strategy face challenges such as selecting the right platform, ensuring seamless integration with existing workloads, and managing licensing and operational costs. Without a clear strategy for governance, security, performance, and compliance, business risks may arise.

This Blue Mantis workshop educates teams on hypervisor assessment principles, evaluates capabilities across key infrastructure and operational domains, and delivers tailored, actionable recommendations to optimize migration strategies, reduce risks, and drive long-term operational success.

Optimized Migration Strategy

The Blue Mantis Hypervisor Strategy Workshop equips IT leaders with the insights to develop an ongoing hypervisor strategy. The workshop provides foundational education on migration principles, assesses organizational readiness across 20 critical disciplines, and delivers tailored, actionable recommendations. IT executives gain strategic insights to optimize migration, minimize risks, and achieve long-term operational success.

Benefits

- Build a strong foundation with essential hypervisor assessment principles to provide an aligned hypervisor migration.

- Evaluate your current capabilities across key disciplines to identify improvement areas for a successful transition.

- Receive tailored recommendations and a maturity benchmark to optimize migration processes and achieve long-term success.

Alternatives

On Premise	Public Cloud / Colocation	
VMWare → No Migration	Public Cloud	← Cloud Strategy
Re-Virtualize (Non-VMWare or HCI)	Colocation	← Colocation
Containerize	Containerize	
Distributed Cloud (Azure Local, Outpost, Nutanix Distributed Cloud)	Distributed Cloud	Modernize

Non-VMWare

Delivering actionable insights and tailored recommendations to optimize the migration, minimize risks, and ensure long-term operational success.

Let's meet the future.
